Acquisition Resource Management System

13 June 2000

Leo Kinslow

Business Management Office

Program Executive Office

Command, Control and Communications Systems

Purpose

To provide an overview of the Acquisition Resource Management System (ARMS)

Make ARMS software available to the Acquisition community

ARMS Mission Statement

- **Interface with existing HQ, DA standard automated programs**
- **Have real-time accessible data**
- **Increase efficiency and create a paperless environment**
- **Increase data integrity**
- **Eliminate duplicated efforts**

Background

- ARMS was developed as a joint effort between PEO C3S and PEO IEW&S by CALIBRE Systems Inc.

Operational since 1995

What is ARMS?

- **A fully functional resource management system that captures real-time data**
- **Captures multi-sourced electronic data and integrates the data into one central repository**
- **Produces standard and/or customized reports**
- **Archives data for future reference in a paperless environment**

Software/Hardware Requirements

Server

- **WEB server running IIS4.0**
- **Microsoft SQL server 7.0 (case sensitive)**

Client

- **Any computer with a browser and internet access**
 - **IE 3.2 or higher**
 - **Netscape 3.1 or higher**

Fully Functional ARMS Modules

*Official Database Locks
(PB, POM, BES)*

Extended Program Planning

Database Lock Comparison

All Army or Department-Specific

Execution Tracking

Monthly Execution

Obligation Plan

*Variance Reporting (Obligation
& Disbursement)*

RDAISA
(automated download)

Execution
(automated download)

ARMS
Capabilities

Congressional
(manually entered by
SAIC at parent level)

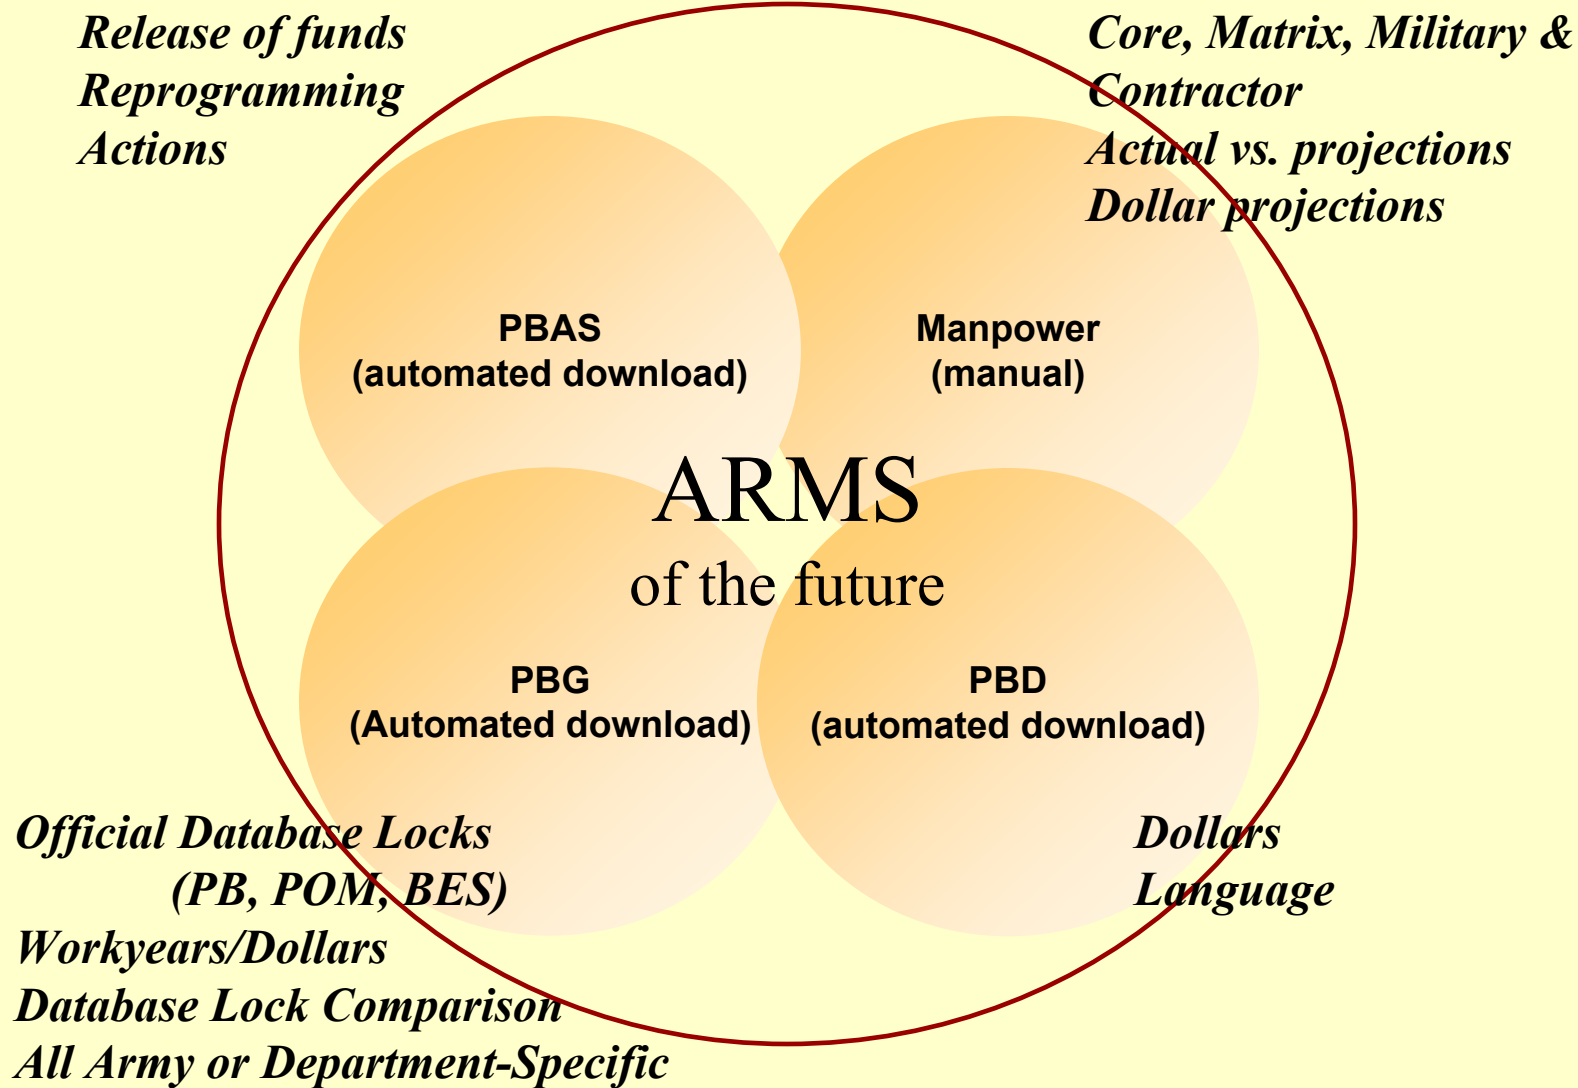

**Program
Adjustments**
(manual)

*Marks
Language*

*Taxes (SBIR/STTR/PBDs)
Release of Funds
Reprogramming Actions*

ARMS on the Horizon

- Secure Socket Layer (SSL)
- Password Protected
- Read/Write Authority
- Firewalls

- Global access via the World Wide Web
- Browser Independent
 - *Internet Explorer*
 - *Netscape*
 - *Other*

Summary of ARMS

- **Automated downloads minimizes manual input**
- **Real-time, web-enabled and accessible worldwide**
- **Analytical tool for Resource Management**
- **Available for standard proliferation throughout the Department of Defense community**
